DETAILED ACTION

Allowable Subject Matter

1. Claims 1-41 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or fairly suggest the claimed invention.
2. Specifically, no teaching or obvious suggestion was found of the limitation "determining a position at which the three-dimensional object will be positioned relative to the ultraviolet light source when the at least one surface is to be irradiated with the desired ultraviolet light flux; determining an unmodified ultraviolet light flux which would irradiate the at least one surface when the ultraviolet light source is activated while the three-dimensional object is at the position relative to the ultraviolet light source, producing an optical element, based upon the unmodified ultraviolet light flux and the desired ultraviolet light flux, which provides a modified wavefront of the ultraviolet light flux produced by the ultraviolet light source and which optical element, if positioned in a path of the wavefront of the ultraviolet flux to the at least one surface, would cause the modified wavefront to irradiate the at least one surface with the desired ultraviolet light flux; positioning the optical element in the path which the wavefront of

the ultraviolet light from the ultraviolet light source would follow in irradiating the at least one surface" as in claims 1 and 36.

3. Claims 2-35 and 37-41 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US Pat No 6,887,233 issued to Angeley et al; US Pat No 4,812,957 issued to Hill; US Pat No 5,652,757 issued to Okazaki et al; US Pat No 6,649,921 issued to Cekic et al; and US Pat No 6,505,948 issued to Cekic et al.
